PROFILE

Dynamic front-end developer proficient in React, JavaScript, HTML, and CSS, passionate about crafting responsive and visually captivating web applications. Skilled in problem-solving and dedicated to continuous learning of emerging web development trends and best practices. Ready to collaborate with talented teams to deliver exceptional user experiences on dynamic projects.

PROFESSIONAL EXPERIENCE

Motion Graphics Designer

Myntra Fashion   01/08/2018 - 01/04/2024

- Utilised Adobe Creative Cloud suite to design captivating motion graphics, enhancing visual appeal and engagement in digital content creation.
- Demonstrated proficiency in analysing and conceptualising web motion graphics, translating ideas into compelling visual narratives that resonate with target audiences.
- Leveraged Adobe XD and Figma to craft innovative web layouts, integrating basic HTML and CSS principles to optimize user experience and interface design.
- Exercised strong leadership skills to effectively guide teams in collaborative projects, while consistently delivering solutions to complex design challenges within strict deadlines, showcasing adept problem-solving and time management abilities.

PROJECTS

Delicious Pizza   Demo

- Developed a robust ReactJS-powered pizza customization platform featuring secure payment gateways and responsive design.
- Utilized NodeJS and ExpressJS for backend functionality, while leveraging MongoDB for efficient data management. Proficient in JavaScript and CSS, I prioritized user experience and interface design to ensure optimal performance and accessibility.

Unlimited Shopping   Demo

- Unlimited Shopping is a comprehensive online platform offering a diverse array of products across categories such as electronics, fashion, home goods, beauty, and beyond.
- Leveraging robust e-commerce frameworks, the site provides seamless browsing and purchasing experiences for users. From electronics to fashion and home essentials, our platform caters to diverse consumer needs with a focus on accessibility and convenience

Expense Tracker   Demo

- The Expense Tracker React project is a web application built using React.js that helps users manage their finances by tracking expenses and income.
- Users can add, edit, and delete transactions, categorize them, and visualize their spending patterns through interactive charts. The project utilizes React hooks for state management and allows for a seamless user experience with responsive design.
